

FLOCK BOOST

LAMING

DO YOU WANT GREATER SURVIVAL RATES AND MORE KG'S OF LAMB?

Optimise ewe performance for maximum lamb output by addressing essential requirements with **TPM Flock Boost LAMING**.

Designed as a high density all-in-one mineral supplement that optimises uptake of key nutritional components **TPM Flock Boost LAMING** is available in an easy to use loose lick powdered formulation with weather resistant qualities.

TPM Flock Boost LAMING is specifically designed to meet the nutritional challenges specifically caused from the stress of lambing and lactating, to increase both ewe and lamb productivity performance to achieve more kilograms of lamb produced.

TPM Flock Boost LAMBING is designed to impact lamb survival rates through the ewe’s key uptake of specifically formulated minerals throughout the pre-lambing period as well as provide the opportunity for more kg’s of lamb produced per breeding unit.

TPM Flock Boost LAMBING is a weather resistant mineral supplement, containing elevated levels of magnesium with balanced calcium, phosphorus and vitamins A, D & E that are essential to a lambing ewe, with additional micro minerals to minimise limiting factors and accelerate reproductive success.

TPM Flock Boost LAMBING has been designed to assist the lambing process through specially formulated mineral ratios to support the metabolic changes required for parturition, colostrum and subsequent milk production to give you greater strong healthier lambs and ewes.

Grower trials have shown
“Up to 2.34 kg live weight extra on lambs at marking,
with greater survival and 5.2% less ewe deaths compared to a control group”
Rees Farms, Penshurst VIC.

USE TPM Flock Boost LAMBING IN CONJUNCTION WITH THESE TIPS FOR FURTHER SUCCESS

- ✓ Condition score prior to joining and provide a rising plain of nutrition to support conception.
- ✓ Separate twin and single bearing ewes—provide greater nutrition and space for twin bearing ewes to meet requirements of both groups.

ESTIMATED CONSUMPTION RATES

- 15-25 grams per day for Pregnant Ewes, provided 3 weeks Pre-Lambing to end of Lambing.

Provide ad-*lib* in well drained containers near clean water source.

STORAGE

Store undercover, away from direct sunlight in a cool dry place.

Available in 25kg bags of 48 per pallet.

Caution: ANIMAL USE ONLY
Does not contain Restricted Animal Material

TECHNICAL ANALYSIS:

Calcium (Ca)12%
Phosphorus (P)4%
Magnesium (Mg)12%
Salt (Na Cl)30%
Sulphur (S)2.5%

Containing balanced levels of
essential Micro Minerals for the Lambing Period:
Cobalt (Co), Copper (Cu), Iodine (I), Manganese (Mn)
Selenium (Se) & Zinc (Zn)

Also includes Vitamins A, D & E for immune support.
